

CLOUDNINE LAW

CloudNine LAW is the eDiscovery industry's most reliable paper and electronic discovery platform. This on-premise platform comes with LAW Scan and ED Loader, but can be upgraded with Turbo and Explore. If you are just working in paper discovery, CloudNine LAW Scan can be purchased separately. See our below fact sheet for more details!

Why is CloudNine LAW so popular for over 2 decades?

Helping legal professionals meet the wide spectrum of discovery demands.

Trusted paper discovery and eDiscovery data processing platform for over 20 years: Scan paper and process investigation and electronic data and enjoy complete flexibility for document review and production.

Reduce the cost of the discovery process with the most comprehensive processing, imaging, and production solution on the market.

Process eDiscovery In House

Maximize your control and cost certainty.

Streamlined processing

LAW supports over 4800 distinct native file types, more than any other eDiscovery processing platform. Make any document ready for review with automated OCR, content and metadata extraction, language identification, and threading.

Scalability

Expand your environment horizontally (across many machines) or vertically (make use of high-end machines with many processors). Build it to suit your needs and workflows.

Versatility is Key

Processing, Imaging, Producing, Printing, Scanning, and Scripting. CloudNine LAW continues to deliver!

SUPPORT FOR OVER 4,800 FILE TYPES FOR IMPORTING AND EXPORTING:

Import data into CloudNine LAW directly from raw files or CloudNine Explore and export directly to CloudNine Review, Concordance® or other leading document review platforms in a wide range of formats.

SCALABLE TO HANDLE EVEN THE LARGEST IMAGING, ENDORSING, OCR OR BULK PRINT JOBS

Powerful production capabilities:

CloudNine LAW leads the way in document production, including the most flexible imaging and endorsing capabilities including searchable PDF, .tif, .jpg, extracted and OCR text, in formats compatible with all leading review platforms or production formats.

Benefits of CloudNine LAW

- » Take back control of the discovery process and ensure that data is under your control in your environment
- » Scalability: Expanding your environment brings maximum processing power to tackle the largest of projects
- » Full customer support and professional services with the team that supported CloudNine LAW for decades
- » Plug into any eDiscovery workflow as CloudNine LAW exports to all major review platforms

CloudNine LAW Advantages:

Turbo Import — 64-bit, multi-threaded ingestion engine providing linear scalability and multi-agent file processing to support the “big data” challenge facing organizations today.

Turbo Import and Turbo Imager Produce Fast Document Conversion

- » Import large data sets including mailstores, archives and forensic images with Turbo Import, a 64-bit, scalable ingestion engine supporting multiple agents – with minimal infrastructure requirements.
- » Expedite document conversion with new, agent-based Turbo Imager tool – no additional resources or 3rd party software required.
- » Save on multiple license requirements and reduce costs maintaining multiple Office licenses.
- » Turbo Imager is offered together with Turbo Import licenses. For each license of Turbo Import, clients will also receive a license of Turbo Imager, or vice versa.

Support Multiple User Instances on a Single OS

- » Process batch data as instances complete or as next LAW machine becomes available to reduce the need for additional hardware requirements.

Easy Installation and Configuration Utilities

- » Centralized tools to install and configure your LAW environment with minimal effort.
- » Connect local machines to the central database and automatically update backend files and validate configuration properties.
- » Launch the program with “Open Case” interface with options for immediate action.

Organize and Manage Imports

- » Configure and control ascending/descending date sorting.
- » Image Handling
- » Scan and import raw images into Turbo Import cases and replace image load files.

CloudNine LAW is so easy to use – I learned how to operate the software in just a few days and I’m now able to run data loading on up to 30 computers at one time. The software is simple but its capabilities are robust.

Source Management

- » Quickly sort, filter, and delete imported sources in a user-friendly staging interface. Leverage advanced Date Filtering and automatic Date Sorting on import.

Modern Certification and Compliance

- » 64-bit Office deployment to ensure compliance.
- » Process with FIPS OS encryption to comply with base-line security configurations that NIST calls STIG. LAW is certified for compliance under NIST 800-53 Rev4.
- » Run LAW on systems with a supported version of Windows (10, 11, Server 2016, 2019 and 2022).
- » Works with SQL Server 2016, 2017, 2019, and 2023

Backbone of our document imaging and eDiscovery processes

For 20 years Reliable has trusted and depended on LAW to form the backbone of our document imaging and eDiscovery processes. Built from the ground-up, with the features and flexibility we needed to handle a wide variety of workflows, the product has stood the test of time and is as relevant today as when it was first released. Many other applications have come and gone, but CloudNine LAW remains integral to Reliable's continued success.

CloudNine Explore

As an add-on to CloudNine LAW, CloudNine Explore is an on-premise Early Case Assessment (ECA) and eDiscovery processing solution, CloudNine Explore, reduces the cost of using outside vendors and allows you to be in more control of your data. CloudNine Explore has 4500+ file type support using in place data processing, without file expansion. With a desktop and web utility, internal and external users can access filtering, search and review options with scalable processing. A fast, secure and easy way to investigate issues, assess risk and compliance, and begin early case assessment.

CloudNine Explore allows:

Early Data Visibility

Gain visibility earlier than ever into size/scope of discovery to identify costs & risks. Determine the size of the data set before moving to review or production. Evaluate potential risk and potential cost influxes at the earliest possible point.

Early Case Assessment

Pre-filter data at the source from any location, any time.

Streamlined processing

With over 4500+ support file types, no data source goes undiscovered. Automated OCR, content extraction and language identification every document is ready for review.

Scalability

Options to expand your environment vertically or horizontally to fit your organization's needs.

Increase what's defensible

Make your eDiscovery more defensible by maintaining a log of every action of each authorized user. Reduce the risk of producing privileged data.

Why add CloudNine Explore to your CloudNine LAW technology stack

- » Determine the size of the data set before moving to review or production.
- » Avoid costly and time-consuming production of irrelevant documents.
- » Make your eDiscovery more defensible by maintaining a log of every action of each authorized user.
- » Reduce the risk of producing privileged data.
- » Evaluate risk and potential cost at the earliest possible point.
