

On-Premise eDiscovery Review Simplified

Continuing Innovation with Deployment Options

CloudNine Review On-Premise

Powerful eDiscovery. Complete Control. Proven Performance.

In a cost-conscious environment with pressing eDiscovery deadlines and increasing data volumes, your organization needs technology that delivers speed, defensibility, and total control over sensitive information.

CloudNine Review On-Premise empowers your team with a secure, self-managed eDiscovery platform deployed within your own infrastructure — giving you maximum data control while maintaining the flexibility and performance today's matters demand.

With over 20 years of experience in eDiscovery, CloudNine provides trusted technology and expert services designed to help legal teams accelerate time to evidence without sacrificing security, scalability, or cost uncertainty.

CLOUDNINE REVIEW IS ONE POWERFUL DOCUMENT REVIEW PLATFORM:

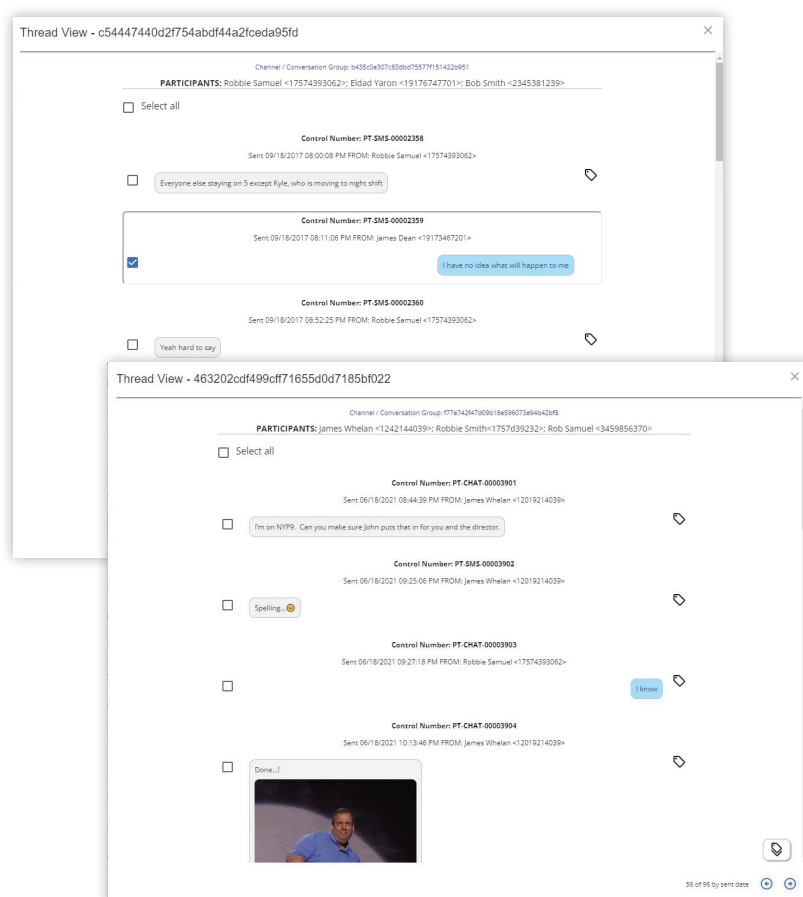

Available in the cloud or wherever you want to deploy eDiscovery has never been easier! With fast, self-service ingestion, review, and production, CloudNine Review's easy-to-use platform provides a stellar user experience and empowers law firms and enterprises to control eDiscovery with world class review functionality.

Platform and Business Alignment		
Streamlines processing (LAW Built In): With over 4,800+ supported file types (everything from text and corporate chat messages to audio and video files, no data source goes undiscovered anymore due to cost or data management. The automated OCR, content extraction, conversation threading and language identification reduces the time it typically takes to prepare all data and documents for review.	Deployment choice: Deploy CloudNine Review within your own infrastructure, whether on-premise or in a private cloud environment such as AWS or Azure, giving your organization complete control over system configuration, data access, and security standards. CloudNine Review SaaS options are also available.	Accelerates review: With near duplicate clustering, email threading, inclusive email identification, auto redaction, native review of modern communications, culling data is easy. Reviewing all forms of data in one platform allows faster review and tagging complete conversations and data together.
Simplifies production: Make the complex simple with production templates. All production requests can now be accommodated with an easy free export.	Preserves context: The native review workflows allow reviewers to see how conversations migrate through different communication channels. See conversations start in email, move to Slack and continue over WhatsApp.	Cost Certainty: Eliminate pricing uncertainty with a model designed for stability. No matter how your data volumes expand or what data types your matters require, there are no additional fees—providing financial predictability across every case.

CloudNine Review

Data Processing, Early Data Assessment, Analysis, Review and Production

Designed for cases of all sizes, the automated drag-and-drop processing support for thousands of unique file types, renders texts & chats after deduplication and filtering, organize data to review in context or threads, produce out to all industry standard review platforms with self-service built-in templates for easy sharing.

Social Media

YouTube, TikTok, X, Facebook, Instagram and 100's more

Structured Data

Financial records, chat bots, computer forensic artifacts and more

WHAT CLIENTS ARE SAYING ABOUT CLOUDINE

Great E-Discovery Company!

We have worked with CloudNine on several cases, and have been quite happy with the service that we have received. Their support staff is responsive, friendly and helpful in assisting me with providing the technical information that my clients need. Their review platform, CloudNine Review, is robust, easy to use and ideal for a firm like ours where we don't have to buy and support the software.

- Katheriue Convea, Senior Associate at Dow Golub Remels & Beverly, LLP
