

SIMPLIFY EDISCOVERY WITH AN INDUSTRY PIONEER INNOVATING EVERY DAY.

In a cost-conscious environment with pressing eDiscovery deadlines and tight budgets, you need to rely on self-service technology with full eDiscovery services support that is proven, and gets the job done at an affordable price.

We are an eDiscovery provider with a 20+ year history offering both SaaS, on-premise with full data and project management solutions that are easy to use and help speed the time to evidence.

CLOUDNINE REVIEW IS ONE POWERFUL DOCUMENT REVIEW PLATFORM:

eDiscovery has never been easier! With fast, self-service ingestion, review, and production, CloudNine Review's easy-to-use platform provides a stellar user experience and empowers law firms and enterprises to control eDiscovery with world class review functionality.

Integrates seamlessly

Streamlines processing

With over 4,800+ supported file types (everything from text and corporate chat messages to audio and video files). No data source goes undiscovered anymore due to cost or data management. The automated OCR, content extraction, conversation threading and language identification reduces the time it typically takes to prepare all data and documents for review.

Accelerates review:

With near duplicate clustering, email threading, inclusive email identification, auto redaction, native review of modern communications, culling data is easy. Reviewing all forms of data in one platform allows faster review and tagging complete conversations and data together.

Preserves context:

The native review workflows allow reviewers to see how conversations migrate through different communication channels. See conversations start in email, move to Slack and continue over WhatsApp.

Simplifies production

Make the complex simple with production templates. All production requests can now be accommodated with an easy free export.

Ensures security

Ensure unauthorized access. With single sign-on, IP restrictions, ISO certification and a SOC 2 data center, security is built into CloudNine Review.

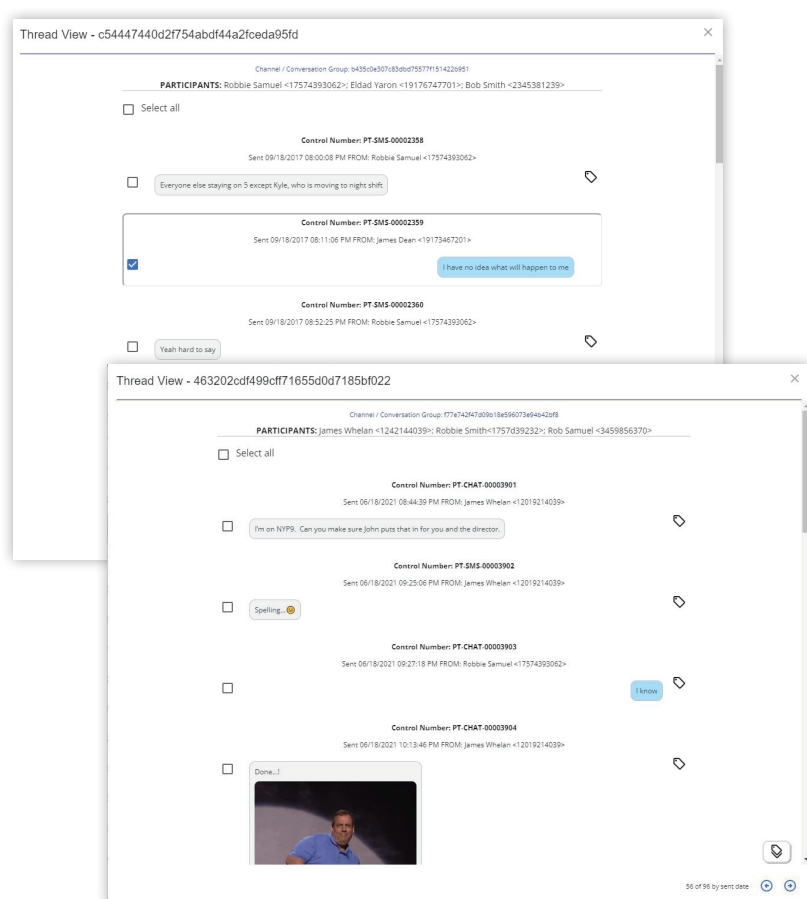

Review metrics and analytics

CloudNine Review displays advanced analytics and reporting for complex and large review projects. Quickly see project statistics, review decisions and speeds and key word reports.

CloudNine Review

Data Processing, Early Data Assessment, Analysis, Review and Production

Designed for cases of all sizes, the automated drag-and-drop processing support for thousands of unique file types, renders texts & chats after deduplication and filtering, organize data to review in context or threads, produce out to all industry standard review platforms with self-service built-in templates for easy sharing.

Manage multiple traditional and modern data types while preserving the context allowing for simple investigation and review **WITHOUT** having to convert to documents first!

The most important evidence is found in today's modern data types:

All Communications

Text messages, SMS, MMS, Slack, MS Teams, WeChat, Skype, Facebook Messenger and 100's more

Social Media

YouTube, TikTok, X, Facebook, Instagram and 100's more

Structured Data

Financial records, chat bots, computer forensic artifacts and more

WHAT CLIENTS ARE SAYING ABOUT CLOUDINE

Great E-Discovery Company!

We have worked with CloudNine on several cases, and have been quite happy with the service that we have received. Their support staff is responsive, friendly and helpful in assisting me with providing the technical information that my clients need. Their review platform, CloudNine Review, is robust, easy to use and ideal for a firm like ours where we don't have to buy and support the software.
