Ways

CloudNine enhances investigations and eDiscovery

How one Fortune 150 company used CloudNine to understand their data in investigations and eDiscovery to save over \$1 million during their first 12 months of use.

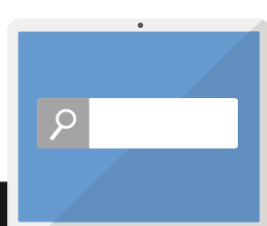

Augmented Established Workflow

Working directly with members of the customer's infosec, audit, and compliance teams, CloudNine was integrated into established company investigation workflow.

This integration allowed the company to address and complete time-sensitive investigations within 24 hours of initiation.

#1

Decreased Investigation Lifecycle

The power and precision of CloudNine's simplified eDiscovery automation enabled the client to decrease investigation lifecycles from months to weeks.

This capability directly contributed to the ability to address over 50 cases and six terabytes of data within one six month period.

#2

Simplified & Accelerated eDiscovery

The full-featured eDiscovery capability of CloudNine simplified and accelerated the transition between audits and investigations into traditional eDiscovery review, increasing the efficiency across departments.

#3

Automated Tasks and Processes

With CloudNine the customer was able to address and automate key task and process requirements of company audits, investigations and eDiscovery from a single, integrated, and fully automated easy to use SaaS platform.

#4

Used by In-house and Outside Counsel

Validation of CloudNine as an effective eDiscovery tool by an independent third-party legal technology and risk management consulting firm coupled with court approval for the use of CloudNine as part of the client's eDiscovery process directly contributed to widespread acceptance by the client's in-house and outside counsel.

#5

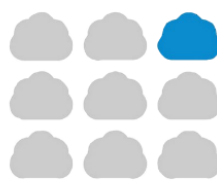

Saved Customer More Than \$1 Million Dollars

The speed, simplicity, and security of CloudNine directly contributed to the Fortune 150 customer saving more than \$1 million dollars during the first year of implementation.
