

CloudNine Concordance®

Import, review and produce eDiscovery documents in-house at an attractive annual predictable cost. Add additional users as needed for collaboration and faster review. And, this can all be deployed on a small, manageable computing footprint.

The background of the lower half of the page is an abstract, low-poly geometric design in shades of blue and purple. It features a grid-like pattern of rectangular blocks that recede into the distance, creating a sense of depth. Overlaid on this are several glowing, cyan-colored lines and dots that form a network or data flow pattern, suggesting a digital or technological environment.

Used by more than 70,000 litigation professionals, CloudNine Concordance is an effective, cost-efficient way to manage and review the high volume of documents generated during discovery.

- **Robust Searching:**
Search text and metadata to find potentially relevant documents fast.
- **Review Workflow Management:**
Easily categorize and manage documents with user created tags and tag folders.
- **Meet Production Obligations:**
Create image and/or native file productions with corresponding industry-standard load files.
- **Support Downstream Needs:**
View, annotate and redact images and near-natives for production, or print for depositions and expert witnesses.
- **Multi-User Support:**
Support multiple reviewers over LAN or WAN and schedule routine jobs using Administration Console.
- **Maximize Capacity:**
Build databases without predefined limits and work across multiple databases at one time.
- **Access it Anywhere:**
Use mobile license for case portability.

What's New in CloudNine Concordance

- *Enhanced production options:*
 - *Generate an attachment range for production images.*
 - *Create placeholder images for unsupported file types or missing images.*
 - *Improve separator sheets.*
- *Search for documents with redactions.*
- *Strengthen communication security.*

CloudNine Concordance Case Study

Issue - Client needed a scalable eDiscovery management and review platform for a small non-technical legal support team.

Solution - CloudNine Concordance was implemented to make eDiscovery workflows easier and more efficient.

Results - CloudNine Concordance let the two-person team manage more databases with greater control in six months than in all the previous year.

About CloudNine

Every day, CloudNine Software helps our 1,000+ clients answer their most pressing discovery questions.

Established in 2002, CloudNine has offices in Houston, Raleigh and Dayton with remote employees throughout the USA.

Benefits of CloudNine Concordance

- Improved efficiency for evaluating document responsiveness, ensuring fewer mistakes and more accurate and defensible results.
- Flexible reporting to produce formatted, customized reports for fact review and trial preparation.
- Foreign character language support, including both Unicode™ and European languages.
- Direct interfaces with external applications such as Clustify and CaseMap®.

“Concordance has made a major difference in how we review documents. We use Concordance daily because of the simplicity and ease of use.”

CloudNine Concordance Streamlined eDiscovery

Import, search and organize email and other electronic documents quickly and accurately:

- Send scanned paper documents and electronically processed files directly from CloudNine LAW™ software to Concordance discovery management software for more detailed review.
- Email and document wizards make it simple to import e-documents—and keep the original formatting, metadata and hyperlinks to native documents, as well as parent-child relationships between email and their attachments.
- Accelerate review speeds using built in features to find or tag related parent and attachment documents.
- Easily change the fields and the order in which they appear in Edit and Table Views for a personalized workspace.

Recommended Technical Specifications

Concordance Desktop Server Hardware Recommendations:

- Dual 3GHz Xeon® or Pentium HT (hyper-threaded) processors or higher.
- 8 - 16GB RAM.
- 40GB of disk space or higher.

Concordance Desktop Server Software and System Recommendations:

- Microsoft® Windows 7 (64 Bit) or Microsoft® Windows Server 2008 R2.
- Microsoft® Outlook 98 or Higher (32 bit).
- High-speed Internet connection.
- The .NET Framework 4 or higher.
- Two open ports for inbound/outbound traffic.
- Two open ports in the firewall are also needed for inbound and outbound traffic.

CloudNine Differentiators

FLEXIBILITY	ADAPTABILITY	COMMUNITY	TECHNOLOGY
On-premise, mobile, cloud or hybrid deployment.	End-to-end or complementary applications.	Hundreds of experts around the world ready to help.	Easy to deploy, manage and use.
