NEW RELEASE ANNOUNCEMENT

Release Notes   February 2022
CloudNine Concordance 10.25

Demonstrating an on-going commitment to our law firm and corporate legal clients along with a national network of channel partners and service providers, we are excited to announce the newest release of **CloudNine Concordance, version 10.25**.

Release Theme for Concordance 10.25: Experience your existing databases in a brand-new way through Concordance Viewer. The new and modern look provides a consistent user experience throughout the application.

Viewer Flexibility:

- Convert Concordance Native Viewer and Concordance Image databases to the Concordance Viewer, released in V.10.24, March 2021.
    - Improved doc-to-doc navigation speeds
    - Increased production speeds
    - Additional Markup types and color productions in the new Viewer
    - Available for single or concatenated databases

- Flexibility to utilize legacy viewers or Concordance Viewer for new databases.

- Enhanced user experiences with consistent viewer functionality.

> **USE CASE:** With Concordance supporting multiple viewers, users now have the flexibility to standardize the interface across their databases for an improved consistent review experience.

UI Improvements:

- New database color scheme, icons and menus offers an updated modern look

Performance:

- Improved handling for large files and production sets
- Miscellaneous performance improvements

Maintenance:

- The release of CloudNine Concordance version 10.25 also includes a variety of maintenance updates and bug fixes.
